

*"Low stimuli spark off.
Moderate stimuli develop.
Strong stimuli handicap.
Oversized ones destroy."
(Hugo Kükelhaus)*

creafon® no1 (product description)

Content: 48 coined cards (leather) and 6 plectrums
Creative sounding game for 1 – 6 players; every age

creafon® no1 - easy, slow and quiet - stimulates acoustic, tactile and visual perception. **creafon®** works according to the principle of "low skills - high sensitivity". A perfect play material corresponding to the ideas of Hugo Kükelhaus.

creafon® no1 is, thanks to its reduced form, stimulating play material for a contemplative break on your own or for an inspiring round in creative company. The precious leather cards, reduced to only a few characteristics, hold many secrets and hide wisdom. Even learning to know the material is a fascinating (and literally unique) moment:

Lay the 48 cards on a large table and follow the arising inspiration with your co-players.

All senses are challenged in revealing the richness of inconspicuousness. **creafon® no1** demands relaxed concentration and (focussed) leaning back in search for the meaning of life and for the happiness of the moment.

creafon® no1 is play material for many quiet and slow games, for intensive shaping and reshaping, for meticulous searching and comparing and for the joy of discovering, understanding and inventing. Most of the suggestions for playing with **creafon®** are not about winners and losers, but rather

about enjoying one's own creativity and the creativity of others

about the pleasure of discerning a problem and trying to solve it alone or with others

about the play with acoustic, tactile and visual forms

about basic questions of language, art, music, mathematics, and life
